

SEAK LIGHTING CONTROLS

SEAK

19% of global energy consumption is for public lighting

**With smart lighting control we
save typically 40% of that energy.**

**Good lighting
cuts night-time
crime by 39%***

* According to 2017 study *The Impact of Street Lighting on Crime in New York City Public Housing*, linking to http://urbanlabs.uchicago.edu/attachments/store/50eab357f0ee925539c8e72d1f0d6380d7ac0670bec31b63473c1dd7c5e2/Lights+report_10.20.17.pdf

Smart Lighting Control is nothing new
There are more solutions for lighting control

1

Based on GSM modul
(SIM card) in each
luminaire

**Expensive equipment +
Monthly costs**

2 Radio mesh networks

Not stable

New building or tree...

3 SEAK powerline lighting control

We use existing 230V wires
to transmit control signals.

No new cables

No antennas needed

SEAK Powerline Technology

Base principle

Unique, original, low frequency powerline communication designed especially for lighting control.

SEAK Powerline Technology

No repeaters

Maximum distance over powerline is 5 km+

Stability

Immune to noise on the powerline

**So – what is Smart
lighting anyway?**

SEAK Powerline Technology

What is Smart Lighting?

Remote control of each individual luminaire intensity 0% – 100%

SEAK Powerline Technology

What is Smart Lighting?

Remote diagnostics of each luminaire

Smart City Lighting

What is Smart Lighting?

Optimized
automatic mode
(twilight and
motion sensors)

Energy
monitoring
and reporting

Additional
sensors and
applications

Outdoor Lighting Control

Software StreetLite

User-friendly app to control all luminaire settings and receive status reports

Controller

LUMiMASTER SLC-NOM

Provides remote connectivity, management and automatic diagnostic functions in the system. Installed together with the LUMiBOX. Controlled via internet or SIM card.

Modulator

LUMiBOX SLM

Installed in a "cabinet". Forwards control commands to up to 255 luminaires through the powerline, and receives status reports back from LUMiNODEs.

LED DRIVER SCC 30W - 250W

Connected to dimming module and wired to the LED. DALI or 0-10V.

Dimming module (or demodulator)

LUMiNODE or LUMiBAR

Installed inside or on top of the luminaire, and wired to the LED driver. Reads commands from the powerline and (LUMiNODE only) controls the luminaire.

RS485

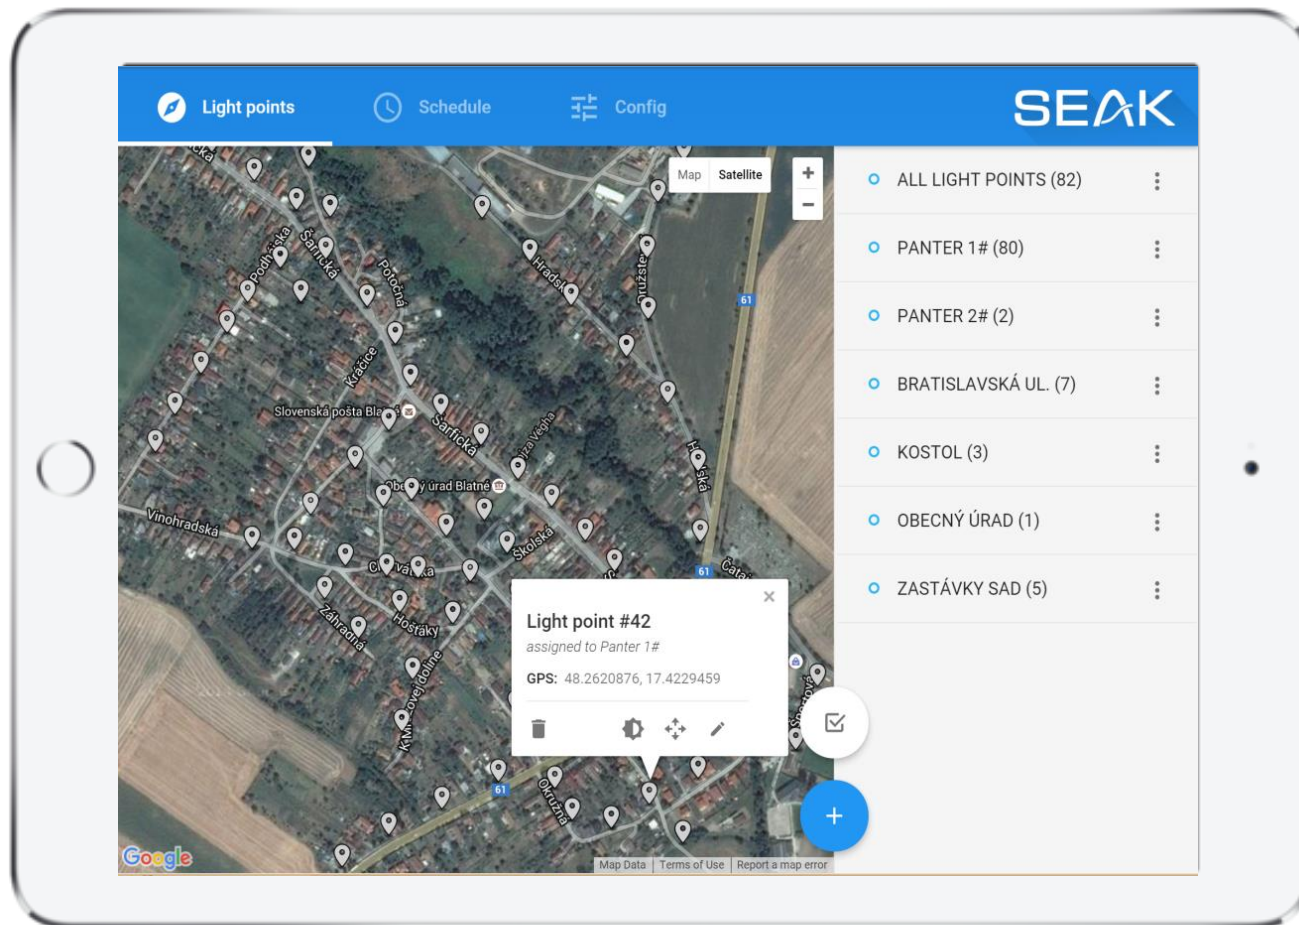

230V

Outdoor Lighting Control

Control & Manage

Use cloud app to do the rest

- Define groups of lamps (main street, park, residential, ...)
- Define dimming schedules for each group
- You can change it anytime, remotely
- See in reports how much you're saving

Indoor lighting application advantages

Great for industrial and commercial halls

Achieve best ROI with lighting upgrade

Guaranteed lux levels at minimum cost

Lights seamlessly adjust to maintain desired illumination

Integrating motion sensors, too

Simple and effective

Retrofitting of old fixtures with smart LEDs

Dynamic lighting groups regardless of cabling

LUMiCHARGER

An affordable public lighting AC electric vehicle charger – 22 kW

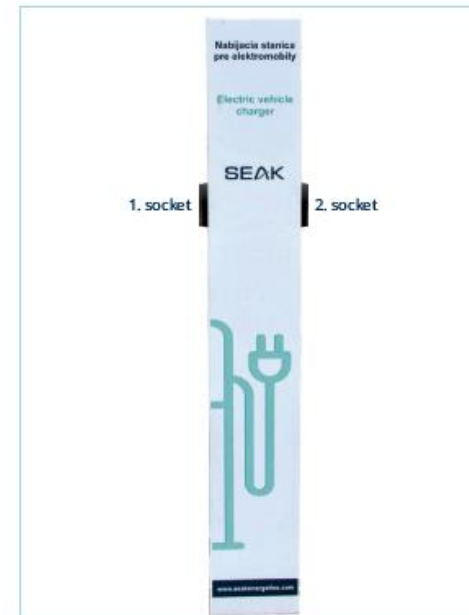

SEAK system is now extended to support EV chargers mounted on lamp poles, that would communicate with our lighting control system to negotiate the power available for EV charging.

LUMiCHARGER WM

Ordering code: LMCHWM

Wallbox, metal

LUMiCHARGER S2S

Ordering code: LMCH2S

Selfstanding pole
with 2 sockets

LUMiCHARGER LP

Ordering code: LMCHLP

Module to be integrated
into lamppost

Smart lighting & EV charging using existing power lines

Example of the use

Day: Luminaires at 0 %

Line capacity: 16 kW

Charging: 8 kW

Charging: 8 kW

Smart lighting & EV charging using existing power lines

Example of the use

Night: Luminaires at 80 %

Line capacity: 16 kW

Light: 5 kW

Charging: 11 kW

International smart award

At Urbis Smart City 2018, the LUMiCHARGER won the Urbis Gold Medal Award for the most innovative Product, when the **commision appreciated** “**the simple deployment of charging stations into existing public lighting network** without the need to install additional communication or power cabling with automated electrical load balancing with the lighting system.”

Four new LUMiCHARGER - electric vehicle chargers (4x Mennekes Type 2) installed on Metodova Street in Presov

Lumicharger vs Standard Chargers

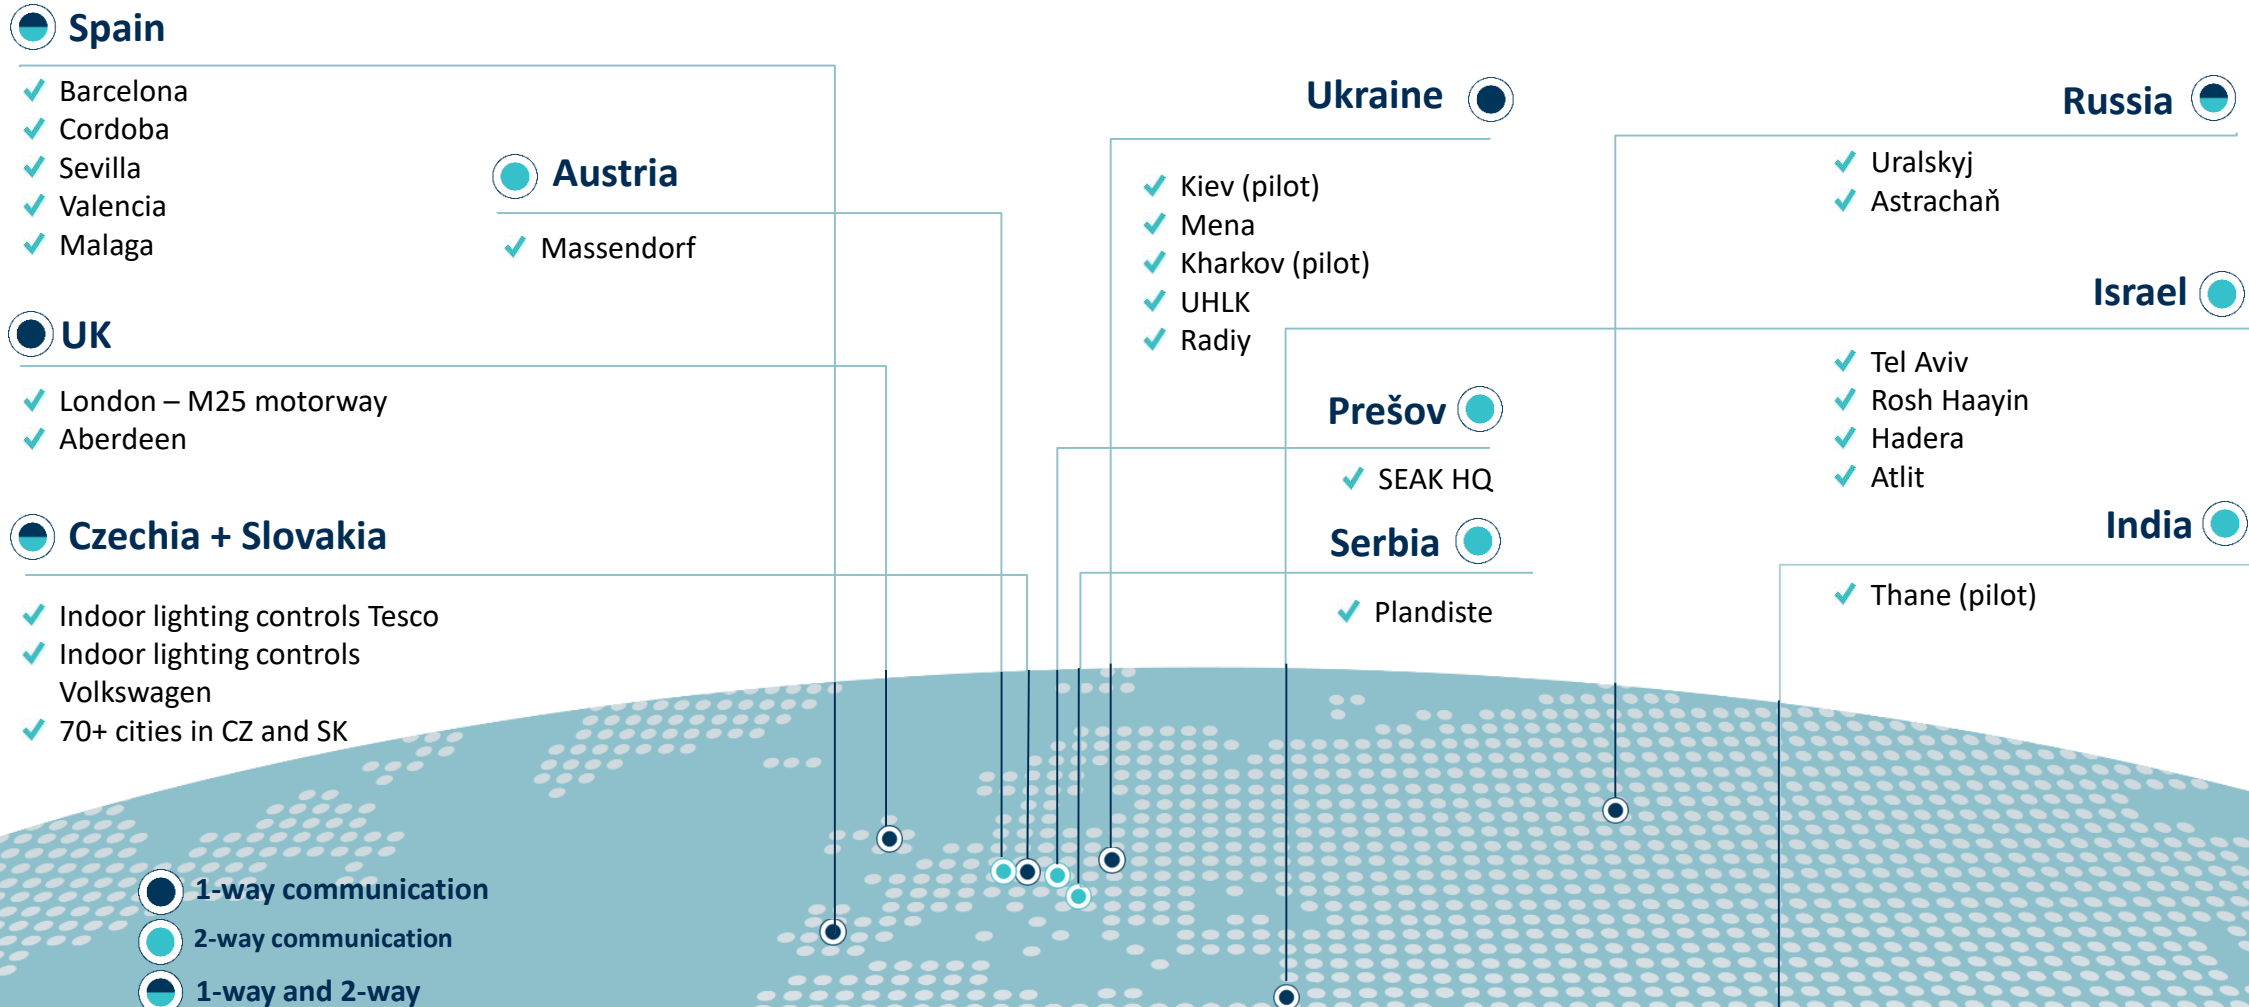

At the price of one DC charger it is possible to build a network of more than 50 AC chargers in the lighting poles in residential area

Four new LUMiCHARGER - electric vehicle chargers (4x Mennekes Type 2) installed on Zelezna Studienka in Bratislava

Installed Base

Over 600.000 luminaires controlled by SEAK technology

Street lighting control

Over 70 cities in Czech Republic and Slovakia

Save 30-40% of energy with SEAK Street light control

Street lighting control

Atlit is the first Israel town to use SEAK

We've integrated with Tel Aviv city control centre too.

The screenshot displays the SEAK (Street Lighting Control) interface. At the top right, there is a blue header with the SEAK logo and a 'סנכרון' (Sync) button. The main area is a satellite map of Atlit, Israel, with numerous white location markers, each labeled with a cabinet ID (e.g., 18_1_3, 18_1_30, 18_1_28). A pop-up window is open over a specific marker, displaying the following information:

- Close button (X)
- Cabinet ID: 9_1_17 (204 מספר)
- Modulator #1
- GPS coordinates: 34.9343035, 32.6793030
- Location name: גו"ת מספר 204
- Modulator #1
- GPS coordinates: 34.9343035, 32.6793030
- Location name: מיקום

On the right side of the map, a list of cabinets is visible, including:

- CABINET #13 (145)
- CABINET #14 (32)
- CABINET #15 (16)
- CABINET #16 (37)
- CABINET #17 (34)
- CABINET #18 (115)

The map also shows various geographical features and labels in Hebrew, such as 'Li-Yam', 'פארק המים נווה ים', 'תורף נווה ים', 'שונית גן איהועים', 'Neve Yam Beach', 'פירת חי', and 'בראשית'.

Street lighting control

Smart lighting for Kiev and Mena in UA

Control lighting and saving energy in existing HID lamps, staged change to LED luminaires

Industrial lighting control

Volkswagen

Updated lighting system reduced VW energy consumption by 1 020 MWh each year.

Outdoor and Indoor Lighting

Commercial lighting control

Majority of Tesco stores in CZ and SK are saving over 50% of energy costs and maintenance.

Sales Area, Shopping Mall, Parking

Facility

How much do you pay for lighting?

Thank you.
